

Clinical Epidemiology Workshop

CRC Hospital Sultanah Nur Zahirah in collaboration with Post Graduate Medical Education Society (PGMES) is pleased to announce a 3-day workshop on "Clinical Epidemiology".

At the end of this workshop, participants will

- able to understand the basic principles and methods of clinical epidemiology
- able to interpret descriptive epidemiologic results in order to develop hypotheses about possible risk factors for a disease
- able to design valid and efficient studies to address clinical problems.

Overview of the content of workshop:

- Introduction to clinical epidemiology theory
- **Diagnostic** research theory
- **Etiologic** research theory
- **Prognostic** research theory
- **Therapeutic** research theory

Who should attend?

Clinicians, pharmacists, clinical researchers and anyone who is interested in learning clinical epidemiology or to hone their skills

Date: 23rd – 25th July 2018

Venue: Sumai Hotel Apartment, Kuala Terengganu

Speakers:

A large part of his research activities comprise of studies around the development of atherosclerosis, its risk factors and its consequences. The studies that he is involved in vary from single center cross-sectional studies to multicenter international trials. He is the head of the USE-IMT Study Group And also an Editor of the European Journal of Preventive Cardiology as well as Journal of Hypertension.
